PROFILE

Frontend developer building React/JavaScript products with practical AI integrations and automation. Developed MedicalCare, a HealthTech platform tested with therapist pilot users. Combine a strong product mindset and user-centered problem solving with API integration, data workflows and disciplined delivery. Growing toward AI solution architecture through hands-on engineering.

FLAGSHIP PROJECTS

MedicalCare | AI-Assisted HealthTech Platform

Patient management, intake, clinical documentation, scheduling, AI-assisted summaries, FHIR-oriented workflows and video progress tracking. React, Vite, Supabase, Medplum/FHIR; pilot feedback from therapists.

InterviewSim | AI Interview Practice

Bilingual Hebrew/English interview simulation, tailored practice, structured feedback, resume analysis and job matching. React, JavaScript, OpenAI API, Supabase; local feedback fallback.

CX Agent Assist | AI Customer Support Demo

Responsive ticket workspace with fictional cases, searchable knowledge base, editable response drafts and optional live AI conversations through Vercel serverless functions.

EXPERIENCE

IT & No-Code Automation Volunteer | Election Campaign Headquarters | 2026–Present

Support Airtable workflows, automation processes, user troubleshooting and operational improvements.

Frontend & AI Application Developer | Independent Projects | 2025–Present

Scope, build, test and deploy React applications integrating APIs, data services and AI-assisted workflows; maintain GitHub project documentation.

Hydrotherapist & Specialized Instructor | 2003–2024

Translated complex needs into practical care plans; built communication, stakeholder and user-centered problem-solving skills.

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), HTML, CSS, Vite, Tailwind CSS | AI & Automation: OpenAI API, prompt engineering, Make, n8n | Data: Supabase, REST APIs, IndexedDB, Medplum/FHIR | Tools: Git, GitHub, Vercel, Jest, React Testing Library | Additional project exposure: Next.js, TypeScript

EDUCATION & LANGUAGES

Frontend training — she codes; AI & automation coursework and independent study | Hebrew: native; English: professional reading, writing and communication
